### **DETAILED ACTION**

1. This Office Action is made in response to applicant's amendment after final filed on 4/30/2008. Claim 4 is currently pending in the application. An action follows below:

#### ***Allowable Subject Matter***

2. Claim 4 is allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for driving a plasma display panel to remove self-erase discharge during a portion of the sustain discharge period. Claim 4 identifies the uniquely distinct features "duration of the second sustaining period is changed according to a percentage of lit discharge cells". The closest prior art, Hashimoto et al. (USPN: 6369781), Takeuchi et al. (USPN: 6686698), Kuriyama et al. (USPN: 6104362) and Nagai (USPN: 6011355) disclose overlapping temporal transitions of pulses but do not discuss different duration periods based on percentages of lit and unlit discharge cells; Takeuchi et al. and Kuriyama et al. discuss different numbers and frequencies of sustain pulses based on percentages of lit and unlit pixels but do not discuss changing durations of periods within a sustain period, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2629

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
